About Us

“Duwrap” is a brand of high-quality Aluminium Disposable Containers, Foil Rolls, Pre-Cut Foil Sheets & much more.

Duwrap is a brand by Dugar Polymers Limited, a unit of Chandantara Dugar Group, a renowned entity in the petrochemicals industry.

As we moved towards the next level of expansion and growth for the Chandantara Dugar Group, we inaugurated a **new manufacturing unit for Aluminium Disposables** in an exceptional facility in the union territory of Dadra & Nagar Haveli, (U.T.), INDIA

Our production facility is in the process of fulfilling all the manufacturing standards such as ISO 9001:2015, ISO 22000:2018, BRC, HACCP, GMP, etc.

With Aluminium, you will always have foil so that your plans are never spoilt.

Capabilities

In addition to our core manufacturing unit, our facility has its own in-house Research & Development (R&D) Team that continuously innovates and maps findings to upgrade existing production practices. The team also works towards **enhancing the facility with hi-tech machinery and conducting quality checks** to improve the quality of our products.

With the help of world-class automation machinery, we ensure “almost zero human touch” during the entire manufacturing process while also sticking to our **commitment to vigilant food related hygienic requirements.**

Our advanced infrastructure also comprises of

75+
Machines

200+
Moulds

In-House **Research and Development** Team (R&D)

Machine Intensive
Manufacturing Process

You have
to be metal
to think that
Aluminium
is not
versatile!

Product Range

At Duwrap, we have an extensive repository of offerings, **“ranging from customised aluminium containers, aluminium foil rolls, pre-cut sheets, platters to innovative gas mats, amongst others.”**

Having serviced industries like

Hospitality

Airlines

Baking

Railways

Retail

Caterers

At a global level, our list of clients is extremely diverse.

Vision

Our vision is to become **one of the largest and most prominent players in the domestic and export market.** We aim to carve a niche in the production of Aluminium Foils, Containers and other Eco-Friendly Disposables in the near future.

We are focused on becoming a premium brand and a household name.

Mission

We are an Earth-First brand that presents an amalgamation of design principles & sustainability practices to pave way for a renewable-powered future.

We are committed to crafted offerings that are planet-friendly and ergonomic.

Aluminium helps save the environment by making sure that global warming's plans get foiled.

Aluminium as a Material

Aluminium is an excellent metal, created from raw materials that are extremely safe and toxin-free.

It is **heat-friendly** and does not produce any harmful products during the heating process. Being **highly malleable**, it is the ideal choice for food packaging and it helps preserve flavour and enhances the shelf life of food products.

With its good decoration features, impeccable cost-performance advantage and the wide range of uses and benefits it offers, aluminium is an extremely versatile and sturdy metal that is now being demanded on a larger scale. Consequently, the production capacities and supply of aluminium is expanding exponentially.

Non-Toxic

Heat-Friendly

Highly Malleable

Aluminium fighting
single-use materials,
one FOIL at a time.

Why Aluminium?

Besides its superior quality and utilitarian benefits, aluminium is a material that recycles forever and also an environmentally sound choice.

It is a material that can be easily recycled and thereby helps reduce emissions and greenhouse gases. There is no significant loss of its benefits during the recycling process, so it is a durable choice. Aluminium is a long-lasting metal that is built for the future.

Be sustainable & use aluminium.

Aluminium is a mono material.

Aluminium is the only packaging material that is recycled 100%.

100% recyclable without loss of property.

75% of aluminium products is still in use.

By recycling aluminium, you save 95% carbon dioxide.

At Duwrap, we envision a sustainable & efficient future

Aluminium isn't destroyed by climate change, it just loves getting hotter.

Features Of Our Products

High Barrier, Anti-Oxidation

Extends the shelf life of food.

Temperature Spectrum

Can withstand temperatures from -40°C to 350°C .

High Mechanical Strength

Strong impact resistance & piercing ability.

Strong Adaptability

Can adapt to various environments.

Easy to Process

Can meet most packaging needs.

Lightweight

Reduces transportation costs & product packaging volume.

Protects Environment

Saves energy without polluting the environment.

Microwavable & Oven Friendly

Aluminium containers are completely safe to use in the microwave/oven.

How To Use Aluminium Containers In Microwave Ovens

The lid or sealing film* must be removed from the container before use.

*If not otherwise stated on packaging.

The meal should cover most of the base of the container.

Place the aluminium container in the middle of the turntable in the microwave oven.

The aluminium container must not come in contact with the walls of the microwave oven.

Only one aluminium container may be used in the microwave oven at a time.

TAKEAWAY & CONSUMER

Food service operators & online food service outlets across the globe have witnessed an increase in 'takeaway' & 'drive through' food.

To address this demand, we at Duwrap are providing a range of products made of high-quality aluminium which ensures that the food remains fresh & intact for a longer period for our esteemed customers. Have a look at our plethora of solutions, available in a variety of shapes & sizes.

GAS MATS

An innovative solution, our gas mats ensure the user does not have to worry about those tough stove stains or removing stuck crumbs ever again. Just place a Duwrap gas mat before you start cooking, then throw it off once you're done. It's that easy!
